

## **Exhibit 6**

### **Nuñez, Dina Declaration of Standing**

## DECLARATION OF DINA NUÑEZ

I, Dina Nuñez, do hereby state as follows:

1. My name is Dina Nuñez. I am of legal age and competent to give this declaration, and everything that matters in this declaration is based on my personal knowledge, unless otherwise specified. I am giving this declaration for use in the legal challenge of Vecinos para el Bienstar de la Comunidad Costera (Vecinos) to the proposed Rio Grande LNG and Texas LNG liquefied natural gas terminals as well as the proposed Rio Bravo oil pipeline.

2. I am 60 years of age and live alone at my home in Brownsville, Texas. I have lived in Brownsville as of 1993, and have lived in my home as of 2007, and do not plan to move.

3. I am currently an organizer for Border Workers United (BWU), a community organization which is building a workers leadership to develop a movement for labor justice in the border communities of Texas. I have worked for BWU for 3 years. Before working for BWU, I worked for 5 years as an organizer with Casa De Proyecto Libertad in Harlingen, Texas, and 11 years with Movimiento del Viaje.

4. Through my work with BWU, I have also worked with Vecinos. Vecinos is a community organization formed to create an organizing movement and fight for labor and environmental justice. I have worked as an organizer for Vecinos as of 2017 to fight for protecting our communities and environment. Vecinos holds community meetings every month, and I help with planning the meetings. Meetings cover different topics, such as knowing your rights, testimony, and protests.

5. The leadership of Vecinos is selected for their commitment and participation in getting the community together. Occasionally, I help finance Vecinos' activities. BWU also helps finance Vecinos' activities, providing gas cards, snacks, beverages, and gifts to give to members

who attend meetings and events. Vecinos is directed, supervised, and financed by people who will be affected by Rio Grande LNG's building and operating the Rio Bravo oil pipeline and Texas LNG.

6. Vecinos has fought against different facilities. Vecinos has worked throughout the last 10 years with Sierra Club and the Carrizo Comecrudo tribe. I have previous activism experience against the SpaceX facilities. I also have previous activism experience against Annova LNG's liquefied natural gas terminal (LNG). In 2017, Texas Rio Grande Legal Aid met with Vecinos to fight against three LNG companies, Annova LNG, Rio Grande LNG, and Texas LNG as well as the Rio Bravo oil pipeline.

7. I live about 15 miles away from Rio Grande LNG's site and about 15.5 miles away from the Texas LNG site. I also live 500 feet away from Highway 48. LNG terminal trucks use Highway 48 to bring materials for building terminals, and it has caused lots of traffic and noise. Traffic has increased my travel time, and it has caused air pollution. Building Rio Grande LNG and Texas LNG has also polluted the air and the water. I use Highway 48 and pass by the Rio Grande LNG and Texas LNG site about three times a month when I drive to Boca Chica Beach. Boca Chica Beach is about 5.5 miles away from the LNG sites. I like to go to the beach to relax and watch fishermen and animals. If LNG terminals are built, I would go less often to Boca Chica Beach due to air and sea pollution. Boca Chica Beach has been polluted by SpaceX, and building the LNG terminals will make it intolerable. There is not much vegetation in the Rio Grande Valley, but Boca Chica is one of the few places where there is. I like to go to Boca Chica at night to watch the stars on the beach. If LNG terminals are built, this will also ruin the scenery because of gas combustion, and I will not be able to watch the stars.

8. I also like to go relax on the South Padre Island Beach. This beach is about 5 miles away from the Rio Grande LNG site and about 4.4 miles away from the Texas LNG site. If they build LNG terminals, I would not go as frequently because I would have to travel on Highway 48 and pass by LNG terminals which give off pollution. The view of LNG terminals would also make my experience less pleasant.

9. I also like to go every weekend to the market on Buelah Lee Park where I can buy food from the locals and eat. Park Buelah Lee is about 3,5 miles away from the Rio Grande LNG site and about 3 miles from the Texas LNG site. If the terminals are built, I would not go to the market every weekend because of air pollution. LNG terminals would also ruin the scenery and make a less pleasant experience.

10. I also like to go fishing on Boca Chica Beach and the Port Isabel Dock when my son visits with my grandchildren. If the Rio Grande LNG and Texas LNG terminals are built, we would go less often because of fear of air and sea pollution.

11. If the Rio Grande LNG and Texas LNG terminals and the Rio Bravo oil pipeline are built, there will be a major increase of greenhouse gas emissions. There will be more droughts, tornadoes, and glaciers will continue to melt, causing floods.

I state under the penalty of perjury, under the laws of the United States, that the foregoing is true and correct, on my knowledge, information, and belief.

Executed in November \_\_, 2023.

---

Dina Nuñez

**DECLARATION OF ANTHONY RIVAS**

I, Anthony Rivas, hereby state as follows:

1. I declare that I am a certified translator. I am certified to translate from the Spanish language to the English language, by the National Translator Certification Service. A copy of my curriculum vitae, which sets forth my qualifications is attached to this declaration.
2. I further declare that I have translated the attached declaration from the Spanish language to the English language. I declare to the best of my abilities and belief that this is a true and correct translation of the Declaration of Dina Nunez.

I declare under the penalty of perjury under the laws of the United States that, to the best of my knowledge, the foregoing is true and correct.

Dated November 14, 2023

*Anthony T Rivas*

## DECLARACIÓN DE DINA NUNEZ

Yo, Dina Nunez, por la presente declara lo siguiente:

1. Mi nombre es Dina Nunez. Yo soy mayor de edad y competente para dar esta declaración y todo importa en esta declaración se basa en mi conocimiento personal, a menos que se especifique lo contrario. Doy esta declaración para su uso en el desafío legal de Vecinos para el Bienstar de la Comunidad Costera (Vecinos) a los propuestos terminales de exportación de gas natural licuado de Rio Grande LNG y Texas LNG y al propuesto de el oleoducto de Rio Bravo.
2. Yo tengo 60 años y vivo sola en mi casa en Brownsville, Texas. Yo ha vivido en Brownsville desde 1993 y ha vivido en mi casa desde 2007 y no tengo planes de mudarme.
3. Actualmente soy organizadora para Border Workers United (BWU), una organización comunitaria que construye un liderazgo de trabajadores para desarrollar un movimiento por la juticia laboral en las comunidades fronterizas de Texas. He trabajado por BWU por 3 años. Antes de trabajar con BWU trabajé como organizadora con Casa De Proyecto Libertad en Harlingen, Texas por 5 años y con Movimiento del Viaje por 11 años.
4. A través de mi trabajo con BWU, trambién trabajo con Vecinos. Vecinos es una organización comunitaria, que se formó para crear un movimiento organizativo y luchar por la justiciar laboral y ambiental. He trabajado como una organizadora para Vecinos desde 2017, para luchar por proteger a nuestras comunidades y al medioambiente. Vecinos tiene reunions comunitaries cada mes y yo ayudo a planificar las reuniones. Las reuniones cubren diferentes temas como conocer tus derechos, testimonios, y protestas.
5. Los liderazgo de Vecinos se selecciona por su compromiso y participación en reunir la comunidad.De vez en cuando ayudo a financiar las actividades de Vecinos. BWU

tambien ayuda financiar las actividades de Vecinos dándoles tarjetas para gasolina, aperitivos, bebidas, y regalos para dar a los miembros que asisten a reuniones y eventos. Vecinos es dirigido, supervisado, y financiado por personas que se verán afectadas por la construcción y operación de Rio Grande LNG, el oleoducto de Rio Bravo, y Texas LNG.

6. Vecinos ha luchado contra diferentes instalaciones. Vecinos a trabajado con Sierra Club y la tribu de Carrizo Comecrudo durante los últimos 10 años. Yo tengo experiencia previa de activism contra la instalacione de SpaceX. Tambien tengo experiencia previa de activism contra el terminal de gas natural licuado (GNL) de Annova LNG. En 2017, Texas RioGrande Legal Aid se reunió con Vecinos para luchar contra tres compañías de GNL, Annova LNG, Rio Grande LNG, y Texas LNG y el oleoducto, Rio Bravo.

7. Vivo a unas 15 millas del sitio de Rio Grande LNG y a unas 15.5 millas del sitio de Texas LNG. También vivo 500 pies de la carretera 48. Los camiones para los terminales GNL utilizan la carretera 48 para traer materiales para la construcción los terminales y ha provocado mucho tráfico y ruido. El tráfico ha aumentado mi tiempo de viaje y ha contaminado el aire. La construcción de Rio Grande LNG y Texas LNG también a contaminado el aire y la agua. Yo utilize la Carretera 48 y paso por el sitio de Rio Grande LNG y Texas LNG unas tres veces al mes cuando manejo a la playa de Boca Chica. La playa de Boca Chica está a unos 5.5 millas de los sitios de GNL. Me gusta ir a la playa a relajarme y observer a los pescadores y a los animales. Si se construyen las terminales de GNL, yo iría menos a la playa de Boca Chica por la contaminación del aire y el mar. La playa de Boca Chica ya tiene contaminación por SpaceX y la construcción de los terminals de GNL lo hará intolerable. No hay mucha vegetación en el Valle del Río Grande, pero Boca Chica es uno de los pocos lugares donde hay. Me gusta ir a Boca

Chica de noche a mirar las estrallas en la playa. Si los terminales GNL de construyen también arruinará el paisaje por la combustión de gases y no podré ver las estrellas.

8. También me gusta ir a relajarme en la playa de la Isla de South Padre. Esta playa es a unas 5 millas del sitio de Rio Grande LNG y a unas 4.4 millas del sitio de Texas LNG. Si construyen los terminales de GNL no iría con tanta frecuencia porque tendría que viahar por la Carretera 48 y pasar los terminales de GNL que emiten contaminación. La vista de las terminales de GNL también haría que mi experiencia fuera menos agradable.

9. Cada fin de semana también me gusta ir al mercado en el parqu岸 de Buelah Lee donde puedo comprar comida de los lugareños y comer. El parqu岸 de Buelah Lee a unas 3.5 millas del sitio de Rio Grande LNG y a unas 3 millas del sitio de Texas LNG. Si se construyen los terminales de GNL no iría al mercado todos los fines de semana por la contaminación del aire. Los terminales de GNL también arruinaría el paisaje y haría la experiencia menos agradable.

10. También me gusta ir a pescar en la playa de Boca Chica y en el embarcadero de Port Isabel cuando mi hijo visita con mis nietos. Si los terminales de Rio Grande LNG y Texas LNG se construyen nosotros iríamos menos por miedo a la contaminación del aire y el mar.

11. Si los terminales de Rio Grande LNG y Texas LNG y el oleoducto de Rio Bravo se construyen, habrá un gran aumento de las emisiones de gases de efecto invernadero. Habrá más sequías, tornados, y los glaciares seguirán deritiéndose provocando inundaciones.

Declaro bajo pena de perjurio bajo las leyes de los Estados Unidos que lo anterior es verdadero y correcto según mi conocimiento, información y creencia.

Ejecutado en noviembre 13, 2023.

  
Dina Nunez
